

Fund Factsheet

Index Linked (Life)

As at 30 June 2010

Fund performance

Discrete performance

%	30 Jun 05	30 Jun 06	29 Jun 07	30 Jun 08	30 Jun 09
	30 Jun 06	29 Jun 07	30 Jun 08	30 Jun 09	30 Jun 10
Life	1.54	1.26	13.54	-0.73	7.81

Basis: % growth, bid to bid in sterling. Returns are shown net of annual management charges only, with net income reinvested. Returns are calculated using the single priced life fund.

Source all returns: Lipper, a REUTERS company

Cumulative performance

%	1 Mth	3 Mths	YTD	1 Yr	3 Yrs	5Yrs
Life	1.18	1.67	3.25	7.81	21.51	24.94
Benchmark	1.15	1.74	3.99	8.99	27.15	34.31

Source all returns: Lipper, a REUTERS company

Cumulative investment performance – over 5 years

Basis: % growth, total return (net), bid to bid sterling. Returns are shown net of annual management charges. This figure does not reflect initial charges. Cash is represented by the Moneyfacts Average 90 day 10K Index. Source all returns: Lipper, a REUTERS company

Important notes: Past performance is not a guide to future performance. The investment's value and the income from it will fall as well as rise and may be affected by market and currency movements. You may get back less than originally invested. Cash on deposit is more secure, generally more accessible and provides greater certainty of growth.

Fund managers commentary

UK bonds continued to benefit from a flight to quality, as investors sold government bonds from peripheral eurozone markets in favour of core markets. Interest rates were once more held at 0.5%.

The manager maintained the Fund's outright short duration position in June. The portfolio was overweight in 2013 inflation-linked bonds.

Fund objective

The fund aims to maximise the overall return on a portfolio of index-linked securities issued by HM Government.

Investment approach

We aim to achieve the performance objective of the fund by investing primarily in index linked bonds as well as in a range of other fixed income asset classes.

Fund facts

Glossary

ABI Sector – The Association of British Insurers classification scheme for life and pension funds that share similar characteristics, e.g. Balanced Managed

Annual management charge – A charge taken from the fund sometimes referred to as yearly management charge. The charge is expressed as a percentage per annum but is normally taken daily from the fund

Asset allocation – The process of dividing investments among different kinds of asset classes such as stocks, bonds, property and cash

Benchmark – A measure against which the performance of a fund is compared. The benchmark could be an index for example the FTSE 100, or a sector average

Bid price – The price at which you can sell units of a fund

Bonds (Fixed Interest Securities) – A bond can be issued by either a company (corporate bond) or a government (gilt) and is a way of raising capital. Most bonds promise to pay a fixed rate of interest for a given period of time, at the end of which the holders are repaid the capital sum

Cumulative Performance – Represents total return over a given period

Discrete Performance – Represents individual yearly performance

Dividends – A portion of a company's profit paid to the shareholders

Equities – Commonly used term for shares in a company

IMA Sector – The Investment Management Association classification scheme for OEIC/ISA funds that share similar characteristics, e.g. Cautious Managed

Net Asset Value (NAV) – The value of an entity's assets less the value of its liabilities

OEIC (Open Ended Investment Company) – An OEIC is a pooled investment fund of variable size set up as a company. It owns investment assets, for example stocks and shares, gilts, bonds and other financial instruments. The size of an OEIC varies reflecting the market value of its underlying investments

Offer Price – The price at which you can buy units of a fund

Sector Average – The average performance of all the funds within a particular sector, for example the IMA Balanced Managed sector

Underweight/Overweight – Funds have a target allocation to a particular sector or asset type, for example a managed fund may have a target allocation to equities of 50%. If the fund holds 52% in equities it is said to be overweight equities. Similarly if the fund holds 48% in equities it is said to be underweight equities

Yield (Historical) – reflects distribution declared over the past twelve months as a percentage of the mid market unit price, as at the date shown.

Yield (Distribution) – reflects the amount that may be expected to be distributed over the next twelve months as a percentage of the mid-market price of the fund as at the date shown. It is based on the snapshot of the portfolio on that day.
