

# Fund Factsheet

## Ethical

As at 30 November 2011

### Fund objective

To achieve capital growth in the long term by investing in companies whose activities are considered ethical, both in terms of their primary activities as well as in the means of achieving them.

### Investment approach

The fund will select an international portfolio of companies with above average potential for growth. The majority of the portfolio will be invested in the following areas: pollution control; environmental protection; efficient utilisation of material and energy resources; clean fuels and alternative energy systems; healthcare services and medical technology; enabling technologies considered to be beneficial to society. Additionally, the fund will strive to avoid those companies whose activities could be considered to be ethically unacceptable.

### Fund managers commentary

November was a volatile month for global equity markets. The MSCI World index was down 1.2% in local currency terms. Things could have been much worse, however, were it not for co-ordinated action on the last day of trading by the world's main central banks. The move was aimed at easing pressures in the global financial system. We believe that many commodities-related stocks will be sold off as analysts come to terms with the slowing global economy and forecasts are cut. Accordingly, we have sold most of our positions in the materials sector. (As at 30 November 2011. Source: Scottish Widows Investment Partnership Ltd)

### Fund performance

#### Discrete performance

%	30 Nov 06 30 Nov 07	30 Nov 07 28 Nov 08	28 Nov 08 30 Nov 09	30 Nov 09 30 Nov 10	30 Nov 10 30 Nov 11
Life	11.61	-25.53	22.65	10.44	-6.02
Pension	13.67	-25.61	21.86	11.79	-6.59
OEIC	13.14	-26.29	21.44	11.39	-6.70

Basis: % growth, bid to bid in sterling. Returns are shown net of annual management charges only, with net income reinvested for the OEIC and life funds and gross income reinvested for pension funds.

OEIC fund returns are calculated using share class C. Pension fund returns are calculated using the single priced 2000 pension fund. Life returns are calculated using the single priced life fund.

**Contact details:** For further information please contact **Adviser Services** on **0870 607 6771** or visit [www.bankofscotland.co.uk/privateclients](http://www.bankofscotland.co.uk/privateclients)

**Important notes:** Past performance is not a guide to future performance. The investment's value and the income from it will fall as well as rise and may be affected by market and currency movements. You may get back less than originally invested. Cash on deposit is more secure, generally more accessible and provides greater certainty of growth.

## Glossary

**ABI Sector** – The Association of British Insurers classification scheme for life and pension funds that share similar characteristics, e.g. Balanced Managed

**Annual management charge** – A charge taken from the fund sometimes referred to as yearly management charge. The charge is expressed as a percentage per annum but is normally taken daily from the fund

**Asset allocation** – The process of dividing investments among different kinds of asset classes such as stocks, bonds, property and cash

**Benchmark** – A measure against which the performance of a fund is compared. The benchmark could be an index for example the FTSE 100, or a sector average

**Bid price** – The price at which you can sell units of a fund

**Bonds (Fixed Interest Securities)** – A bond can be issued by either a company (corporate bond) or a government (gilt) and is a way of raising capital. Most bonds promise to pay a fixed rate of interest for a given period of time, at the end of which the holders are repaid the capital sum

**Cumulative Performance** – Represents total return over a given period

**Discrete Performance** – Represents individual yearly performance

**Dividends** – A portion of a company's profit paid to the shareholders

**Equities** – Commonly used term for shares in a company

**IMA Sector** – The Investment Management Association classification scheme for OEIC/ISA funds that share similar characteristics, e.g. Cautious Managed

**Net Asset Value (NAV)** – The value of an entity's assets less the value of its liabilities

**OEIC (Open Ended Investment Company)** – An OEIC is a pooled investment fund of variable size set up as a company. It owns investment assets, for example stocks and shares, gilts, bonds and other financial instruments. The size of an OEIC varies reflecting the market value of its underlying investments

**Offer Price** – The price at which you can buy units of a fund

**Sector Average** – The average performance of all the funds within a particular sector, for example the IMA Balanced Managed sector

**Underweight/Overweight** – Funds have a target allocation to a particular sector or asset type, for example a managed fund may have a target allocation to equities of 50%. If the fund holds 52% in equities it is said to be overweight equities. Similarly if the fund holds 48% in equities it is said to be underweight equities

**Yield (Historical)** – reflects distribution declared over the past twelve months as a percentage of the mid market unit price, as at the date shown.

**Yield (Distribution)** – reflects the amount that may be expected to be distributed over the next twelve months as a percentage of the mid-market price of the fund as at the date shown. It is based on the snapshot of the portfolio on that day.
